ENHANCING THE QUALITY OF ROAD CONSTRUCTION

DOCTOR SHABANGU

Mohlakwana Civils and Engineering Construction (Pty) Ltd

was established in October 2013, by Doctor Shabangu with a clear objective to develop into a medium sized and with time, become a major civil construction company.

He possesses a certificate in Project Management and SHERQ with the University of Limpopo in partnership with Eskom and just completed a Pre-Prosperator Program with Raizcorp.

Mohlakwana Civils was formed specifically to take advantage of business opportunities which exists in construction, private and public sectors.

The company has embarked on a few road works projects under Dreykon Klus Civils which were completed successfully and rated excellent thereafter and has recently performed master plan for roads and storm water service for Silica Quartz Pty Ltd including the general supplying to Victor Khanye Local Municipality.

Mohlakwana Civils strives to create wealth and participate on the challenges facing South Africa and endeavors to prove itself as a competent private company contributing to the growth of the South African economy, where recruitment and up-skilling of local communities is inevitably part of a project.

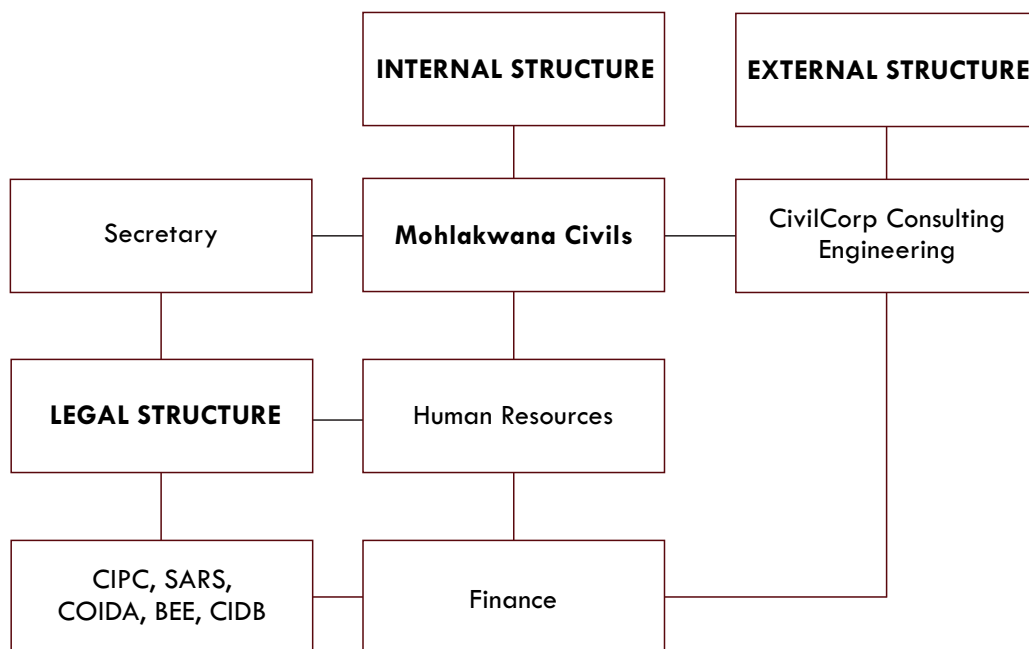

prove itself as a
competent private
company contributing
to the growth of the
South African
economy

MANAGEMENT STRUCTURE

Mr Doctor Shabangu will be involved on a day-to-day running of a business assisted by the whole team to adhere itself to the good management principles, to ensure adequate operation procedures are followed to maintain sound management channels towards reaching profitable decision making process.

Department of good governance such as finance and human resource will be established to ensure proper management of the whole business.

Mr. Edwin van Rensburg the Managing director of CivilCorp Engineering Solution will be responsible for surveys, designs, drawings and monitoring.

We are committed in supporting the Government initiatives with regards to the new labor law and the development of previously disadvantaged communities and individuals. It is our Policy to train previously disadvantaged and unemployed personnel from the local communities and therefore a substantial amount of the annual budget will be approved for training.

We believe that our policy would contribute to a more stable and prosperous economy within the local community and within the broader South Africa.

QUALITY POLICY STATEMENT

The company shall ensure, through its management, company procedures and employees, that every effort is directed towards achieving and meeting our client's desired quality goals.

The company shall work in accordance with clients' Quality Systems, ensuring the specified quality requirements are achieved for all company's services.

Quality officers will be responsible for maintaining quality control procedures in their areas and ensuring line supervision commitment and awareness of quality requirements.

Accountability for possible quality failures will rest with the manager in charge. The company will strive to the implementation of ISO 9001 quality standards.

Our main objective is to create and supply service and materials that meet the client's requirement in all aspects. In order to assist personnel at all levels to attain this objective, specific production and control procedures are followed.

These procedures are incorporated into the quality management system, which ensures regular report back and audit to the relevant management levels.

The quality management system will be maintained and developed in conjunction with other management functions to enhance the overall performance of the company and to obtain ISO 9001 Accreditation.

ENHANCING THE QUALITY OF ROAD CONSTRUCTION

SAFETY & HEALTH POLICY

The company shall strive towards implementation of procedures, which will prevent injury or loss and assure the health and safety of our employees. The company and all of the management place loss incident prevention and the health of its employees as the most important aspect of its operation and in this regard recognize and understand their responsibilities in terms of the O.H.S. Act

The following broad guidelines are used to manage the risks which our employees may potentially encounter:

- The requirements of the Occupational Health and Safety Act are to be met as a minimum and preferably exceeded.
- A policy of “Zero tolerance” will be applied to all deviation from safety rules and safe work procedures.
- Ongoing health and safety training programs are to be implemented involving all employees.
- Risk operations and working circumstances are to be made as safe as is reasonably practicable.
- Risk elimination where practical is preferred to risk management, including the use of PPE.
- The correct personal protective equipment will be issued to employees and the use thereof will be enforced.
- Each and every employee is responsible for general health and safety in the workplace and as such open and frank discussions regarding health and safety issues are routinely held every morning before moving to the work site.
- An effective occupation health and safety management program is run in excess of the legal requirements and those of our clients.

Mohlakwana Civils has a comprehensive safety management system that complies fully with the NOSA and SHE standards. We are committed to ensure that all employees adhere to all rules and regulations stipulated in the guidelines for creating safe working environment and the safeguarding of human lives.
